Welcome

The Premium Binder
2024

A modern interior space featuring a large, light-colored modular sofa in the foreground. In the background, there is a kitchen area with a marble countertop and a wooden backsplash. A dark wooden cabinet with two oval cutouts is visible on the right. The overall aesthetic is minimalist and sophisticated, with a focus on natural materials and clean lines.

Sustainable Development

Let's make a change.

- as why replace when you can
RESURFACE.

We know what matters to our customers.
We understand their challenges and markets.
That is why we offer solutions, solutions that matter.

With this light weight and minimal thickness film,
you can use and extensively achieve any desired
outcome of your choice with our selection of cleverly
curated premium films.

A modern kitchen interior featuring a wooden countertop in the foreground. In the background, there are dark kitchen cabinets, a stainless steel sink, and a range hood. A large, rustic-style glass vase filled with water and white flowers sits on the countertop. A semi-transparent dark box containing text is overlaid on the right side of the image.

Environment

Our stretchable architectural film is eco-friendly.

- Free from harmful heavy metals (lead, cadmium, mercury, hexavalent chromium, etc)
- Formaldehyde (HCHO), the substance that causes sick house syndrome, is not released.
- It meets the safety standard (KF mark standard) applied to wallpaper and paperboard.
- Meets the safety requirements of hazardous chemicals in the Common Safety Standards of Children's Products.
- Excellent maintenance and anti-mold function, which helps to maintain a pleasant surrounding environment.

Technical Information

Product Structure

1. Embossed & printed film layer (vinyl-chloride plastic)
2. Simplified adhesive (Acrylic Plastic)
3. Release paper

The below is a representative structure of our stretchable architectural film.

The actual structures and materials may be slightly different for each series.

Flame Retardency [Certified by International Standards]

Carbonization length less than 20cm	▶	Satisfactory
Carbonization area less than 30cm ²	▶	
Flame retardant certification less than 3sec	▶	
Smoke density 200Ds	▶	

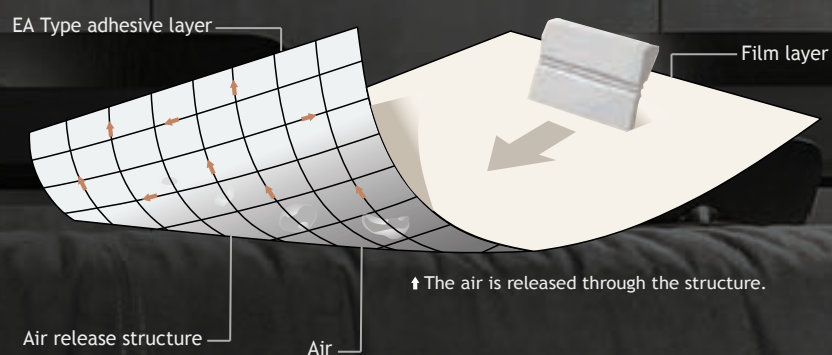

Stain Resistance

Soy Sauce	Cola	10% hydrochloric acid	Coffee	5% ethanol	Wine Vinegar
▼	▼	▼	▼	▼	▼
No Stains					

Easy to install with Air-Egress Technology

Our stretchable architectural film is applied using an Acrylic type adhesive surface with grid grooves for air-release between the film and the substrate.

The air is released along these grooves, enabling the film to be quickly and easily affixed to large or complex surfaces, this provides a higher quality finish & facilitates the release of air when the film is affixed, enabling easy application to large or complex surfaces.
